

## Myntra website component segregation:

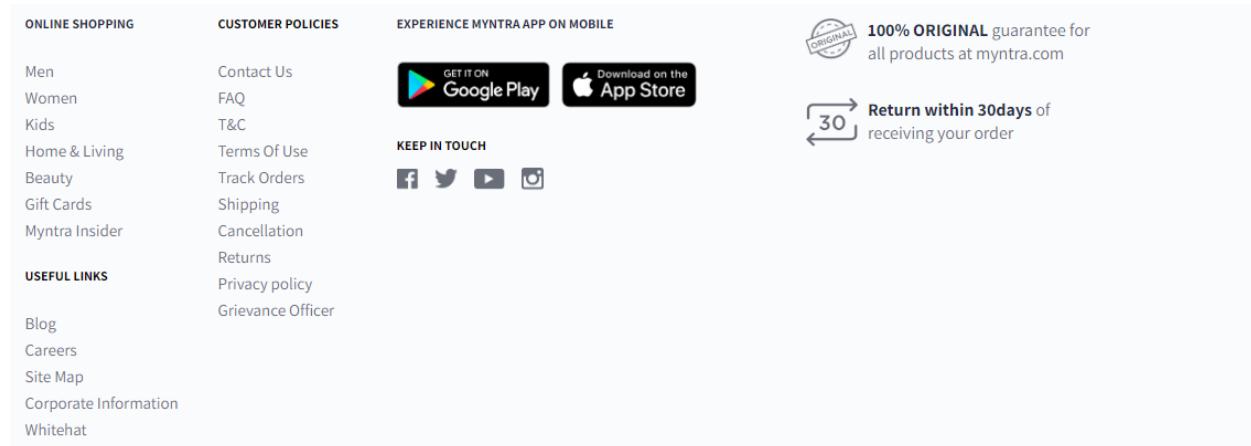

### 1.Header :

Header can be used as a common component each and every page contains Header component

### 2.Footer:

Footer can also be considered as a common component each and every page contains footer component

### 3.Curoser :

Cursor is a component because this cursor is furtherly didnt used at anywhere throughout the website

### HANDBAGS

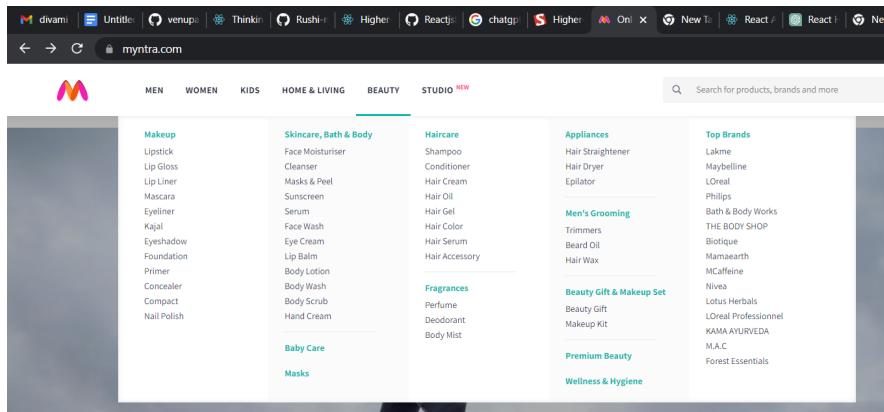

Min. 60% Off

+ Explore

#### 4.tabs in header:

We can consider it as a common component and we can render tabs data dynamically.

We can pass tabs names dynamically in an array if in case even any additional tabs added it will be simple to handle it.

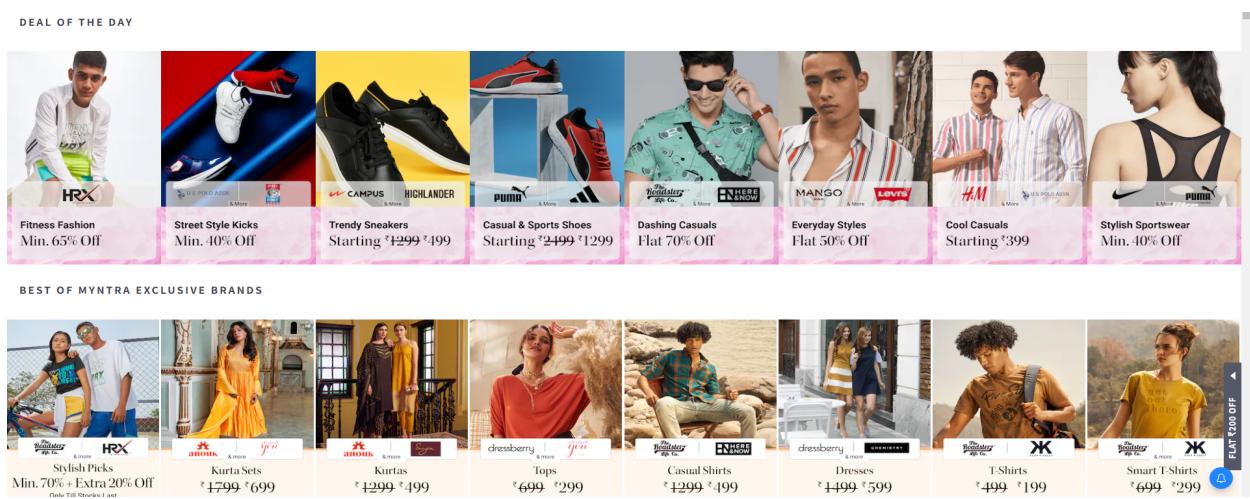

#### 5. Common Chord components:

We can create a common chord component and we can use it throughout the application. Like Deal of the day.

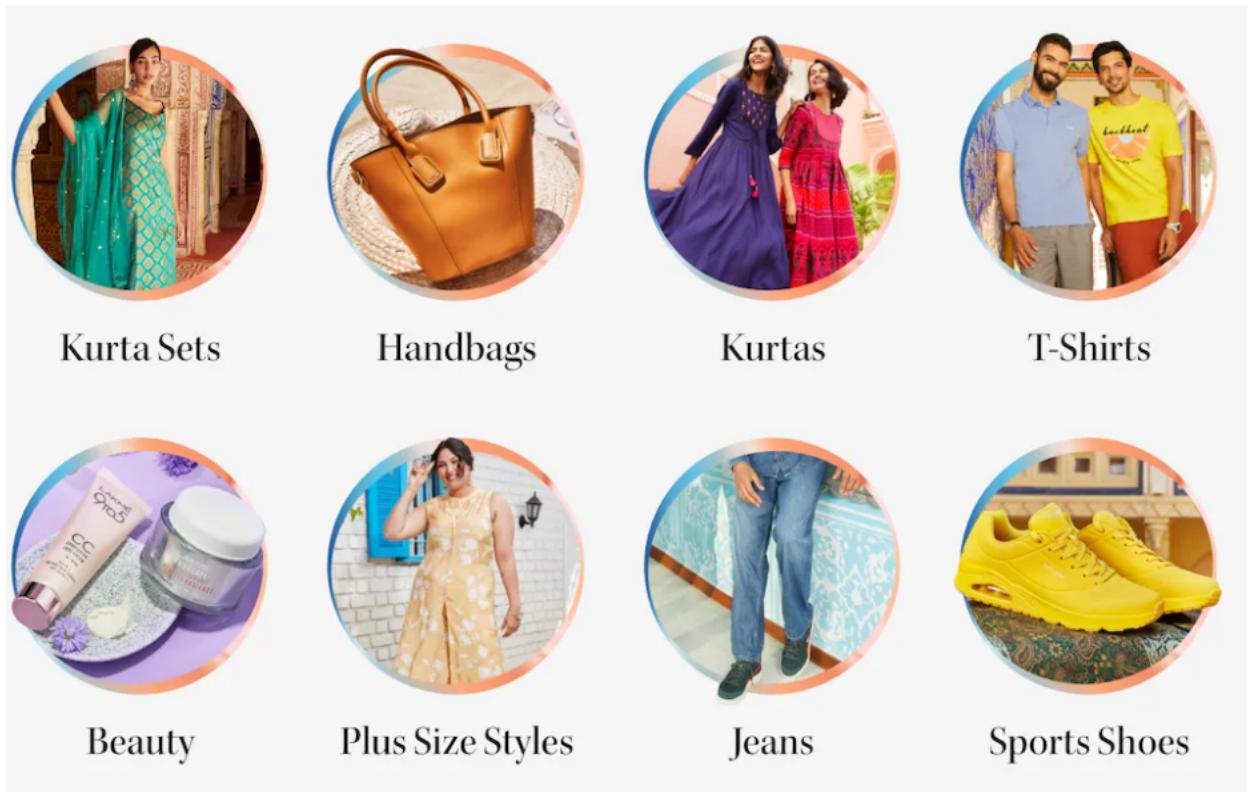

Chord component is common inside component all the chord images and data will get dynamically from server.

We can consider a single chord as a common component.

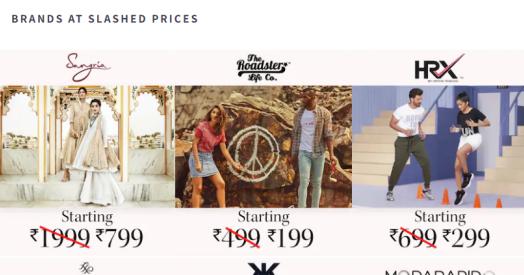

For the below **CATEGORIES OF Bag** can also be considered as a common chord component and we can consider a single chord as a component .  
We can also use the existing components because the functionality is not changing if we are clicking the chord it is just redirecting to the page.

#### CATEGORIES TO BAG

#### BRANDS AT SLASHED PRICES:

This can be created as a common component and the chord data can be as an individual common component.

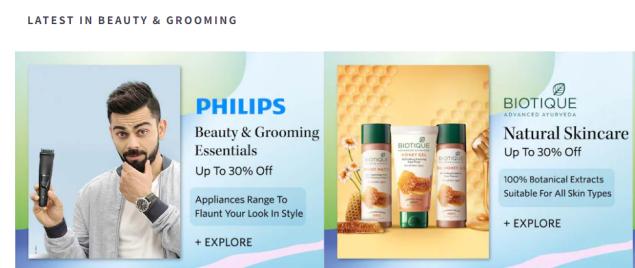

## NEWNESS FOR EVERY OCCASION

This can be created as a common component and each chord as a common chord component.

## LATEST IN BEAUTY & GROOMING

This can be created as a common component and each chord as a common chord component.

## COLOURS OF THE SEASON

This can be created as a common component and each chord as a common chord component.

# TOP INFLUENCERS EXCLUSIVE STYLES

This can be created as a common component and each chord as a common chord component.

## IN DETAILS PAGE:

In this page we can consider filter as one common component and drop down as another common component and Chord as a common component
